

# WSTIMS FOR WINDOWS USERS NEWSLETTER

April 12, 2019

ISSUE 01

VOL. 19

Editor: Jeff Clark

jclarksr94@gmail.com

Programmer: Dave Allen

---

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

---

As we begin the 2019 skiing season, we are continuing to publish the newsletter to keep you informed of the newest add ins for the program and how to use them. From the humble beginnings of the program in 2011, with your help and to meet the scoring needs of our sport, WSTIMS is now a very robust scoring program and continues to be the only scoring program approved for use in the USA-WSWS sanctioned tournaments.

## **Update 5.0.1.3 is Available for Downloading**

The updated version 5.0.1.3 is now available for download. It contains some minor cleanup and fixes in various parts of the program that will solve small issues that came up during the last year. These small fixes that came up in some areas will take care of themselves as they are used again and should not reoccur.

## **Trick Video Upload Naming**

Dave has added additional variations to the file naming for each skiers file. You can use first name last name; last name first name and they are case insensitive. The names in the host computer trick video file name must match the name that you are going to upload. These variations will give you more options in the naming of the files.

## **Slalom Pass Detail Report**

Slalom Pass Detail report located in the Slalom tab on the toolbar is now being sorted by Round, Event Group, Age Group, Ranking Score, Skier Name, and Skier Run Num by default to show the skiers in the same order they skied etc. Very handy when auditing the scores versus the event running order.

The Print icon has been removed and you will now have the option to export the file as a tab delimited text file to Excel. After the download you will be able to edit the file in Excel to meet your needs and then print the document as a PDF. The other icon is Html and will export the file as an HTML document for posting on a website or in an email.

### **Running Order Added Column Select Option**

Scorers wanted the option to control the filtering of the columns that are being used in the Running Orders production. Dave added “Col Select” icon which will give you a list of the columns with check boxes in the report that has the defaults pre-checked and you can edit this to suit your needs and when you exit the settings will be saved by event and to the sanction in use for the tournament. The defaults will be used for each new tournament sanction unless you edit the settings for the tournament.

### **Running Orders For Pick & Choose Format**

In the Tournament>Running Order tabs select “Edit Round” and you will see a new button for pick and choose to use when creating pick & choose running orders by round.

All of the records have been updated to begin the new season for AWSA, NCWSA and IWWF.

If you are in Florida or Southern California, break out the sun screen and for the rest of you stay warm and check out the latest updates.
